

## Middle East and Eastern Europe Regional Situation Report

Situation Report | 18 June 2020

### Situation Overview

**COVID-19 Cases: 87,555**

**COVID-19 Deaths: 2,906**

The situation has been changing across Middle East and Eastern European countries over the past month. While some countries have eased their restrictions, such as Albania, Jordan, and Georgia, the epidemiological situation has deteriorated in other areas. Iraq has gone back into lockdown after a period of relatively lighter regulations. The situation continues to be critical in Afghanistan and Syria with limited testing and healthcare capacity of local systems. Armenia is witnessing an alarming rise in cases, stretching the healthcare system beyond its capacity. Hundreds of people are waiting for space in hospitals and the vulnerable population, especially children, are at even greater risk of lack of access to healthcare services, as well as to basic needs.

World Vision in Armenia continues to provide direct support to affected most vulnerable families, and supports community level health care providers in responding to increasing cases.

World Vision in Iraq, as a result of joint advocacy efforts of the NGO community, continues to deliver essential services to the most vulnerable groups, including internally-displaced people and refugees.

**World Vision is responding to the impact of COVID-19 in 13 countries and territories in the Middle East and Eastern Europe, especially in places where children and families are most vulnerable.**

### People Reached:

**646,462**

**Men 155,294** **Women 187,329**

**Children 303,839**

**Boys 150,292** **Girls 153,547**

*(Based on figures as of 15 June 2020)*

### Key Messages

**World Vision calls on Governments, the UN and the international community to:**

Continue to scale up global COVID-19 prevention and response measures for children and their families by strengthening health systems, engaging and communicating effectively with children and their communities to provide critical child protection interventions and mental health and psychosocial support.

Adopt policies and fund COVID-19 response plans that holistically address the secondary impacts of the pandemic on children and families, particularly with respect to child protection, gender-based violence, education, water and sanitation, food security, and livelihoods.

Ensure access to humanitarian assistance for the most vulnerable children and their families. Find alternatives to humanitarian programme suspensions where COVID-19 prevention policies are required.

### Achievements

World Vision in Afghanistan, in coordination with WHO and Ministry of Haji and Religious Affairs, conducted training for 60 religious leaders and families on COVID-19 prevention. These leaders shared their knowledge and passed educational messages to 1,300 people (950 female/350 males). Information, education, and communication materials (IEC) materials were located at the gates of places for worship.

World Vision Syria Response's "WASH UP!" programme reached 1,600 children through disseminating regular SMS/WhatsApp texts to parents delivering awareness and prevention messages.

World Vision in Lebanon signed an agreement with WFP for food distribution to 4,197 households for 6 months.

## RESPONSE GOAL

To limit the spread of COVID-19 and reduce its impact on vulnerable children and families

## Strategic Objectives

1. Scale up preventive measures to limit the spread of disease

3. Support for children impacted by COVID-19 through education, child protection, food security, and livelihoods

2. Strengthen health systems and workers

4. Collaborate and advocate to ensure vulnerable children are protected

## OBJECTIVE 1: Scale up preventive measures to limit the spread of COVID-19

**239,082**

People reached through promotion of preventive behaviours

**91,866**

Information, education, and communication materials printed and distributed

**219,040**

Community members provided with preventive materials

**237,532**

Handwashing supplies distributed

**40,618**

Comprehensive hygiene kits distributed

**694**

Cleaning kits distributed to vulnerable communities

**48**

Faith leaders disseminating preventive measures

*(Based on figures as of 15 June 2020)*

## OBJECTIVE 2: Strengthen health systems and workers

**1,709**

Community health workers trained and supported

**10,954**

Medical personnel provided with personal protective equipment (PPE)

**130,543**

Masks distributed, including to health facilities, health workers and communities

**745,537**

Glove sets distributed, including to health facilities, health workers and communities

**195**

Medical facilities assisted

**1,392**

Disinfectant kits distributed to health care facilities

**854**

People supported with the securing of safe quarantine and/or isolation spaces

**15**

Quarantine and isolation spaces supported, rehabilitated or set-up

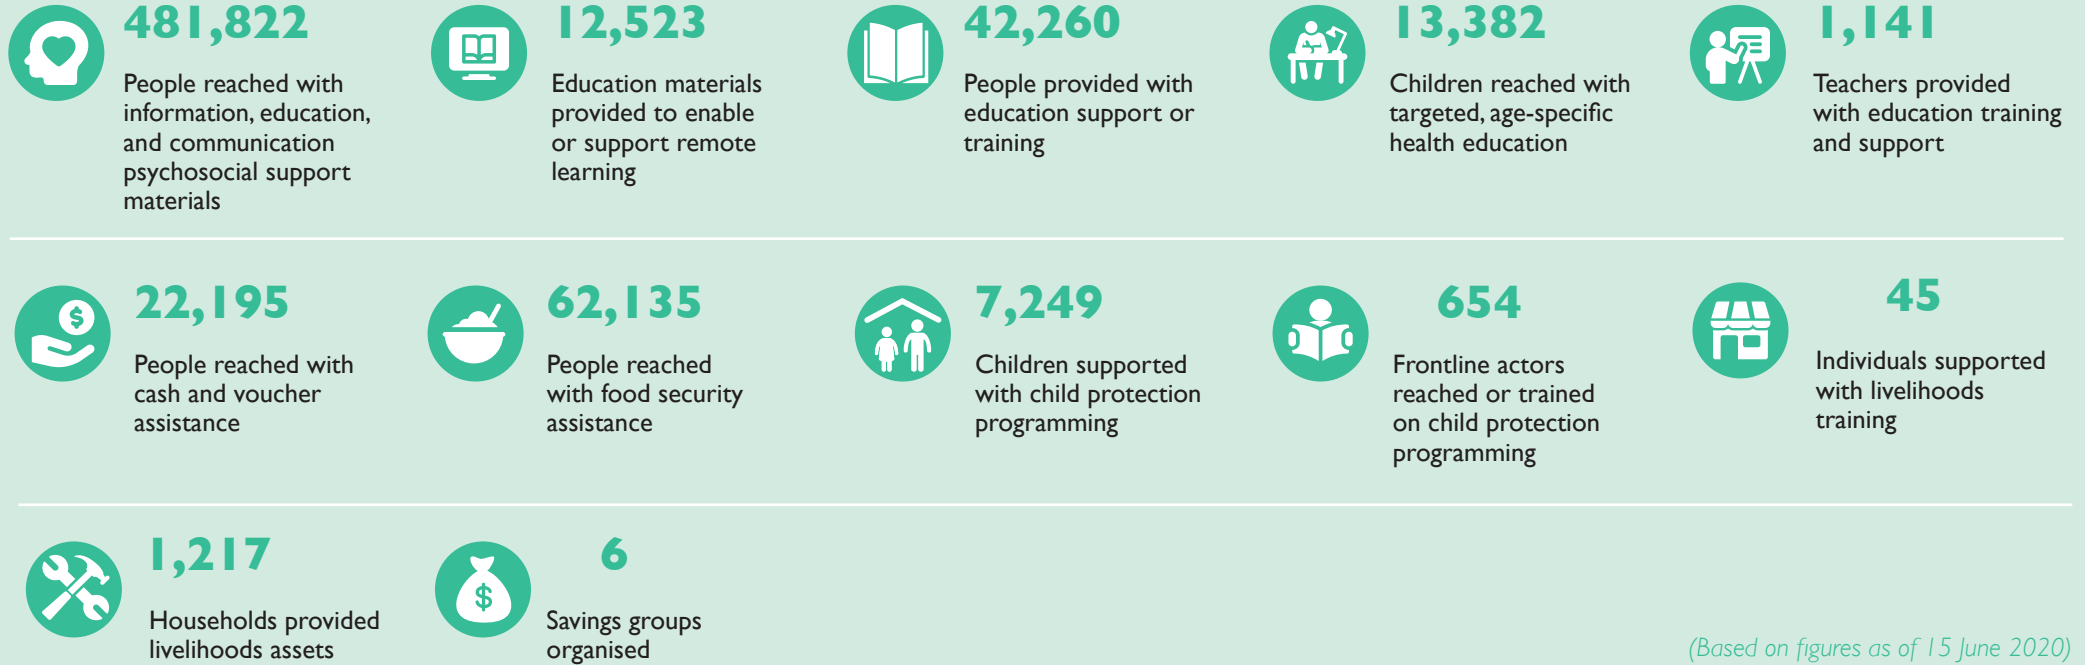

**1,448**

People provided with transportation support

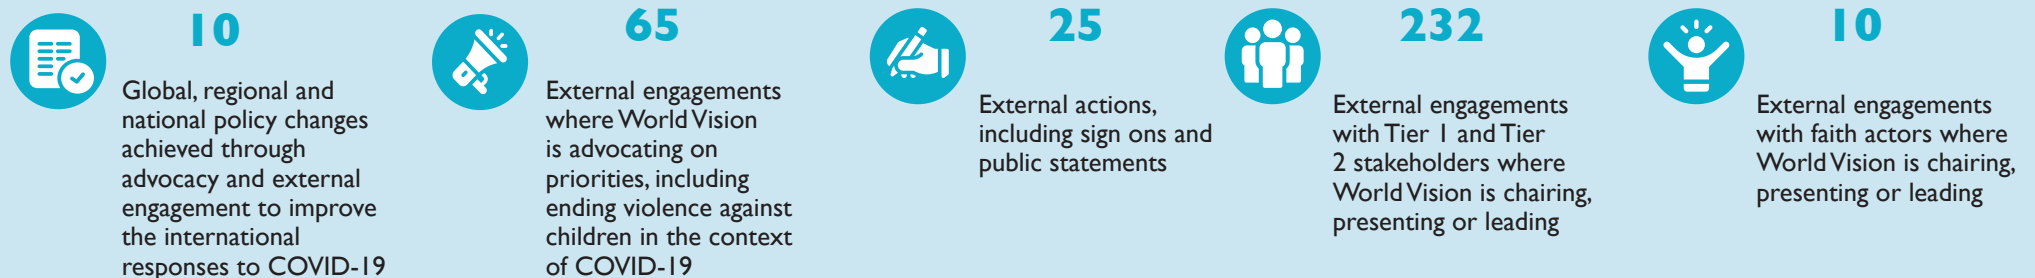

*(Based on figures as of 15 June 2020)*

## OBJECTIVE 3: Support for children impacted by COVID-19 through child protection, education, food security, and livelihoods

(Based on figures as of 15 June 2020)

## OBJECTIVE 4: Collaborate and advocate to ensure vulnerable children are protected

\*Examples of Tier 1 and Tier 2 stakeholders include WFP, WHO, Global Fund, UNICEF, UNHRC, UNOCHA, and national governments
