

NEWSFLASH: "Finishing the Foundations" is Becoming "Recovery Lending for Resilience"

Given the critical need to get recovery loans to people running their own small farms and businesses, World Vision is replacing our “Finishing the Foundations” Fund. We are putting the final touches on “Recovery Lending for Resilience”, which will provide critically needed lending capital, IT capital, and funds to massively scale our Biblical Empowered Worldview training.

As Michael Mithika of VisionFund International explained, “Our clients around the world are facing unparalleled challenges because of COVID-19. Many have seen their businesses close, and others have been experiencing significant slowdowns. As opposed to most banks facing this situation, VisionFund has learned that we need to and can successfully lend into the crisis.”

Mithika explained that VisionFund has experience in “recovery lending” from Typhoon Haiyan in the Philippines, and then the effects of El Nino in Africa.

More information will follow shortly, but for more information on VisionFund’s Recovery lending, click [HERE](#).
