

## WASH in Healthcare Facilities PLUS

### THE NEED

In the remote rural communities of Niger and Zambia where World Vision works, many **healthcare facilities still do not have clean water or basic sanitation**. On top of that, there **aren't enough community health workers to cover the population**.

Can you imagine a mother delivering a baby without clean water? Or parents losing a child to pneumonia, diarrhea, or malaria simply because they don't have access to basic health information and treatment?

Amidst the global pandemic, today's WASH and health needs have never been more critical.

### WHAT WORLD VISION IS DOING

Clean water on the premises, hand washing stations, and improved sanitation facilities

Trained and equipped Community Health Workers

Additional training of existing healthcare facility staff

Critical medical equipment and supplies

Education and mobilization of local faith leaders to reinforce key health messages

Community health workers, like Brian in Zambia, are the backbone of our health programs. They provide critical health education to families in their villages - as well as diagnose and treat life-threatening sicknesses.

## OUR COMMITMENT

World Vision is a global leader in equipping rural health care facilities with clean water and other critical support.

In 2019, when the World Health Organization and UNICEF issued a global call to action to provide water, sanitation, and hygiene (WASH) in healthcare facilities, World Vision responded with a commitment larger than any other NGO.

With your help,  
we can bring clean water  
and sanitation to

**20** rural healthcare facilities in Niger and Zambia

benefiting an estimated **180,000+** people by **2023**

**PLUS**  
train and equip more community health workers to save lives.

## SEE YOUR IMPACT

Your investment of **\$125,000** will bring clean water and sanitation to a rural healthcare facility PLUS train and equip more community health workers.

You will receive a report (typically within 12 months) on a specific healthcare facility that you have helped fund—including photos, GPS coordinates, and the number of people served.
