

FLOODS ALERT:  
EAST AFRICA REGION

WORLD VISION RESPONSE PLAN

June 2018

# Regional Overview

**2 million**  
people affected

**700,000**  
people displaced

**180**  
fatalities

More than **50%** of affected population are children

## SITUATION HIGHLIGHTS

- Heavy rainfall has led to flash floods across East Africa affecting more than **1.4 million** people, while a devastating tropical storm affected another **670,000**
- More than **700,000** people have been displaced, thousands of homes destroyed, schools damaged, hundreds of hectares of farmland ruined and thousands of livestock washed away
- Displaced families are at risk of contracting communicable and water-borne diseases due to lack of clean water, accessible sanitation and hygiene facilities
- Hundreds of children have had their education interrupted as the floods have destroyed classrooms and learning materials
- Many families that rely on agriculture face a challenging year ahead as livestock washed away and fields of crops were destroyed

About the cover photo: In Solai, Kenya where the recent flash floods caused a dam to burst killing 47 people, 6-year-old Peter resumed school in a classroom where learning materials washed away and desks were destroyed

## RESPONSE OBJECTIVES

Enhance access to nutritious food for children and their families

Enhance access to emergency shelter for flood affected families

Help children resume their education

Help children and their families prevent water-borne diseases

Avail protection services to vulnerable children

Improve access to clean and safe drinking water

## OVERALL FUNDING NEEDS

World Vision aims to assist

**102,500** people in it's response to flooding in Somalia

● Funding received ○ Funding requested *Financial figures in US\$*

World Vision is requesting for **\$1,656,800** to adequately respond to flooding in Somalia

### **We will ensure the most needy get the help they need**

**Beneficiary Selection:** The beneficiary selection is a participatory community-led process with facilitation by project staff in partnership with the local community. In general, the targeting criteria is based on economic, physiological and social vulnerability. Consideration are given to very poor households, households with malnourished children under age 5, households with members with special needs (such as disabled breadwinners, elderly or ill), households with orphans, households whose livelihood assets have been depleted (such as pastoralist who have lost livestock) and socially excluded individuals such as those from minority clans. Appropriate complaints and response mechanisms will be applied to deal with emerging issues during the process.

### **We will work with partners to make sure as many people are reached as possible**

**Coordination:** World Vision continues to actively engage in various coordination and cluster meetings and working groups. World Vision will also continue working with other stakeholders including the governments and local authorities as well as with UN agencies, NGOs and the private sector players in all the three countries.

### **We will ensure our team acts quickly and effectively**

**Somalia:** With more than 300 staff, World Vision Somalia has the required capacity to deliver the current emergency response as well as recovery and resilience interventions.

**Ethiopia:** With an existing staffing of over 1,300, World Vision is fully staffed and is ready to enhance both the breadth and depth of this assistance.

**Kenya:** World Vision is well positioned throughout Kenya having four regional offices and cluster teams providing humanitarian assistance across the country.

World Vision aims to assist **250,000** people in it's response to flooding in East Africa
