DELIVERING ON OUR COMMITMENT

## DOUBLE-DIGIT IMPROVEMENTS

### Celebrating Phase 1 results

In 2016, World Vision launched Phase 1 of our Mother and Child Health Signature Initiative with projects in Uganda, Somalia, and Zambia.

These projects are now complete, and we are pleased to report that we reached more than 700,000 women and children, exceeding our target by 63%. Together with our partners, we increased capacity in health facilities, trained more than 7,000 community health workers, and delivered double-digit impact on key indicators, including attended births and infant survival.

From 2016–2019 we reached

**703,775**

**women and under-5**

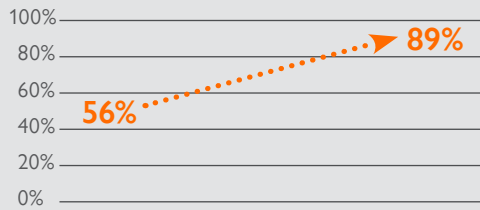

**children** in 18 World Vision

Area Programs in Uganda and Southern Zambia, and 11 districts in Somaliland and Puntland.

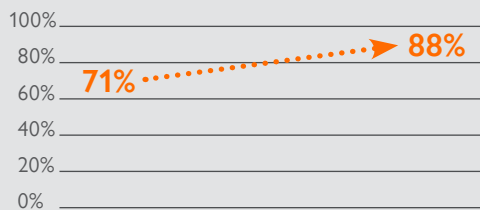

## ATTENDED BIRTHS

increased in Uganda project area

## BREASTFEEDING

increased in Zambia project areas

## INFANT MORTALITY

in Uganda project area reduced by

↓ 27%

## MALNUTRITION

in Somalia project areas had a full recovery rate of

94%

## Exceeding all major targets

Thanks to strong programming, excellent field staff, and highly collaborative partnerships with local Ministries of Health, we exceeded project goals:

MEASURE	TARGET	ACTUAL (2016–2019)
Women and under-5 children reached	431,433	<b>703,775</b>
Community health workers trained	5,273	<b>7,161</b>
Nurses and midwives trained	571	<b>723</b>
Pregnant women attending at least 4 prenatal visits	60,809	<b>89,165</b>
Births assisted by skilled providers at health facility level	88,995	<b>125,776</b>
Children fully immunized	144,710	<b>177,016</b>
Faith leaders trained and catalyzed to support mother and child health	640	<b>808</b>

## Going further and doing more

Thanks to generous private donors, World Vision delivered the right resources at the right time through the right people. As a result, we successfully completed these projects.

Now, we are raising funds for Phase 2 projects with enhanced programming in northern Zambia and Niger. These projects will add treatment of sick children under 5 through the internationally recognized Integrated Community Case Management (iCCM) model, and integrate World Vision's highly effective WASH teams to bring clean water and improved sanitation to healthcare facilities. With your help, we can continue delivering life-saving outcomes for women and children.

HELP END PREVENTABLE MOTHER AND CHILD DEATHS.
